

Anderson-Evans polyoxotungstate

Cat. No.	Amount
X-TEW-1	1 g

Polyhedral (A) and ball and stick (B) representation of [TeW₆O₂₄]⁶⁻ with different coordination modes of the oxygen atoms in panel B.^[1] Figure used by courtesy of Prof. Annette Rompel, University of Vienna.

For in vitro use only!

Shipping: shipped at ambient temperature

Storage Conditions: store at ambient temperature

Shelf Life: 12 months

Molecular Formula: Na₆[TeW₆O₂₄] x 22 H₂O

Molecular Weight: 2148,90 g/mol

Solubility: 100 mM in water

Dissolve 1 g Na₆[TeW₆O₂₄] x 22 H₂O in 4,65 ml water to achieve a 100 mM stock solution.

Description:

The Anderson-Evans polyoxotungstate [TeW₆O₂₄]⁶⁻ (TEW) is a universal and flexible additive for protein crystallization. With its planar structure and high negative charge, it has proven to promote crystal contacts, improve crystal quality and further provides a valuable anomalous signal for phasing due to 6 tungsten atoms^[1].
